Abstract

The absence of a special container to accommodate about regional cultural arts in Indonesia. Particularly Ludruk, which is a distinctive arts city of Surabaya. Many people who are less interested in witnessing the performances Ludruk due to lack of facilities and comfort provided. Therefore, it is necessary to design an art gallery Ludruk with emphasis on comfort and convenience such as, design stage, lighting, acoustics, and air condition. Then for the convenience of visitors and spectators include bleachers appropriate arrangement with the ergonomics point of view of the audience to the stage, air condition, and acoustics. This can give rise to a new atmosphere. Factors that will foster a new atmosphere and to attract young people today to come and watch the show Ludruk. Not only serves as an art gallery area alone, but is also equipped with additional supporting enveloped cafe, a gallery of art Ludruk, office employee, training area, and point of sale merchandise. The analysis process is required in a good art building design in order to create a design that not only can be seen visually but can be felt in the comfort and security of the morning audience, visitors, and employees who work in the theater Ludruk.
