

LIST OF TABLES

Table 1. Performance of Propbank Data Trained on Intra and Quran Domain	2
Table 2. Some Differences Between Propbank and Quran Sentences With Predicate "say" ...	3
Table 3. Accuracy of Quran's Argument Identification Process by practNLPTools (%)	6
Table 4. List of Core Arguments on Propbank [9]	15
Table 5. List of Adjunct Arguments on Propbank [9]	15
Table 6. Examples of Baseline Features Extraction	20
Table 7. Examples of Additional Features Extraction	22
Table 8. Baseline System Features	38
Table 9. Comparison of Naive Bayes and SVM Linear Performance	46
Table 10. Baseline System Performance	46
Table 11. ARG0, ARG1, ARG2 and ARGM-TMP Baseline System Performance	47
Table 12. Example of new argument on Quran	48
Table 13. Confusion Matrix	52
Table 14. Presentation of Training and Testing Data	55
Table 15. Presentation of Features Extracted Data	55
Table 16. Performance of Proposed Features Separately	56
Table 17. The Enhancement of System Performance With Proposed Features	56
Table 18. The performance of ARG0 With The Proposed Features	57
Table 19. Performance of ARG1 With The Proposed Features	58
Table 20. The Performance of ARG2 With The Proposed Features	59
Table 21. The Performance of ARGM-TMP With The Proposed Features	60
Table 22. The Features Performance on All Argument With The Proposed Features when tested on auto labeled data (%)	61
Table 23. Features Performance on All Argument With The Proposed Features when tested on hand-labeled data (%)	62

Table 24. The Correlation Between Proposed Features and Arguments Performance when tested on Auto Labeled Data..... 64

Table 25. The Correlation Between Proposed Features and Arguments Performance When Tested on Hand Labeled Data..... 65

Table 26. The Performance Of Proposed Features Combination 67

Table 27. The Performance of Proposed Features When Tested on Auto Labeled Data..... 69

Table 28. The Performance of Proposed System When Tested on Hand Labeled Data..... 70
