

Interior Design of The Clinic Dogs and Cats

Programmatically

Abstract

In Indonesia nowadays has a lot of veterinary clinics to serve the health care of pets such as dogs, cats and rabbits, for inpatient nor outpatient care facility. Generally, all the clinics in Indonesia only has small-scale. They only able to accommodate in small quantities and the services are limited to certain types of animals. The phenomenon that happened in Indonesian society shows how the nation's economic establishment, although not be spread evenly throughout Indonesia yet. In the big cities in Indonesia, veterinary clinics have scattered and visited by many pet owners. They need a veterinary clinic that can provide care services completely and suit them.

The location for design is Bogor. That selection of the location is based on several considerations. First, most of facilities for pet health care like Veterinary Clinic in Bogor are not complete yet. Second, the fact that Bogor become one of the major cities that have a high-income society. They are a group of people who potentially take care of a pet as a part of their lifestyle. Third, Bogor has many students and graduates of the Faculty of Veterinary from Bogor Agricultural University.

The potentials that exists in Bogor are attractive to offering a plan and a new design for the veterinary clinic in a complete way and comply the standard of animal health service needs. That is a reason to compose designing the veterinary clinic as the final project.
