

## ABSTRACT

The potential of money waqf (Cash wakaf) in Indonesia is very big, according to the General Chairman of IAEI, Mustafa Edwin Nasution, stated that the potential of money waqf in Indonesia can reach Rp 20 trillion per year but currently from data BWI (Badan Wakaf Indonesia) of newly collected funds of approximately 145 billion per year which means still below 1%.

The low number of wakaf participation in Indonesia is caused by the lack of awareness to fulfill the waqf because little information about the wakaf is submitted, whereas wakaf is one of the important teachings in Islam which is included in the charity finger.

In the process of making this Final Project, the author uses observation methods conducted in Bandung, interviews to the head of Dompot Dhuafa branch of West Java and Rumah Wakaf Indonesia, as well as searching the literature and doing literature studies on the required data.

So the authors make the design of mobile applications as a medium of information and payment for the development of waqf by (TWI) Tabung Wakaf Indonesia, in order to increase the number of wakaf money participation in Indonesia so that the improvement of the quality of life of the wider community through the empowerment of wakaf money funds.
