

PREFACE

The gratitude to the presence of God, The Almighty, for his blessing which provided health to us, so the thesis entitled "Delay Reductions on GPON by Modifying Bi-Partition Dynamic Bandwidth Allocation Method" could be completed. This thesis is structured to meet one of the requirements obtained Master degree in Engineering (M.T.) in Electrical Engineering Program in TelkomUniversity, Bandung, Indonesia.

In completing this study thanks to encouragement, guidance, and assistance from various parties, therefore, the author would like to thank:

1. PT. Telekomunikasi Indonesia, as an institution which has provided educational opportunities and scholarships at Telkom University.
2. Dr.Ir.Erna Sri Sugesti,M.Sc, as thesis supervisor I, who has provided guidance, advice, and support during the preparation of this thesis.
3. Sofia Naning H,Ir.MT as thesis supervisor II, which has provided guidance and advice during the preparation of this thesis.
4. Dr. Yosef Fiky Suratman, as Chairman of the Electrical Engineering S2 Program in Telkom University, which has been a lot of give direction in education at Telkom University.
5. All Lecturer of Electrical Engineering S2 Program in Telkom University, which has been a lot to share knowledge and interactions.
6. All staff of Electrical Engineering S2 Program in Telkom University, especially Ms Pravita, which has been of much help in studying in Telkom University.
7. Beloved Parents and Family, who have given understanding so that I can finish this Education.
8. Students Fellow of Electrical Engineering S2 Program in Telkom University, who has always given the spirit of the Class and the completion of this thesis.
9. Leaders, Staff and Employees PT. Telekomunikasi Indonesia Tbk, particularly in Witel Magelang, which has been willing to provide support.

May Allah give a reply on the mind of all sides that authors mentioned above. The authors realize that writing is far from perfect, therefore, the author expects suggestions and constructive criticism in the hope to achieve better results in the future. Finally, with all humility I hope flaws in this thesis can be used as learning to better research in the future.

Bandung, August 2017

Kurnia Triningsih
