

Abstract

Today, most organizations in industry, commerce, and government sectors are fundamentally dependent on the information systems they have. SMA Negeri 1 Rembang as an education institution has used several information systems to support its activities, such as PPDB website for new students admissions.

The successful use of PPDB website in the admission of new students during this year, pushed the IT division SMA Negeri 1 Rembang to develop other information systems. Therefore required a Strategic Information System Planning (PSSI). This research produces PSSI document as reference of information system development of SMA Negeri 1 Rembang for several years ahead. In this research, used method of strategic planning of information system written by Anita Cassidy.
