|--|------------|
| <b>Abstrak</b>                               | <b>i</b>   |
| <b>Abstract</b>                              | <b>ii</b>  |
| <b>Preface</b>                               | <b>iii</b> |
| <b>Table of Contents</b>                     | <b>iv</b>  |
| <b>List of Figures</b>                       | <b>vi</b>  |
| <b>List of Tables</b>                        | <b>vii</b> |
| <b>I Introduction</b>                        | <b>1</b>   |
| 1.1 Background . . . . .                     | 1          |
| 1.2 Formulation of the Problem . . . . .     | 2          |
| 1.3 Constraint of the Problem . . . . .      | 2          |
| 1.4 Purpose . . . . .                        | 2          |
| 1.5 Activity Plan . . . . .                  | 3          |
| 1.6 Schedule of Activities . . . . .         | 5          |
| <b>II Related-Work</b>                       | <b>6</b>   |
| 2.1 Load Distance Method . . . . .           | 6          |
| 2.2 Road Network Model . . . . .             | 7          |
| 2.3 NN (Nearest Neighbor) Query . . . . .    | 8          |
| 2.4 Group NN-Queries . . . . .               | 10         |
| 2.5 Graph . . . . .                          | 11         |
| 2.6 Weighted Graph . . . . .                 | 12         |
| 2.7 Djikstra ALgorithm . . . . .             | 12         |
| 2.8 Group Closest Pair Algorithm . . . . .   | 14         |
| <b>III Methodology and System Design</b>     | <b>15</b>  |
| 3.1 System Description . . . . .             | 15         |
| 3.2 System Architecture . . . . .            | 15         |
| 3.2.1 Manufacture Dataset in Table . . . . . | 15         |

|                               |   |           |
|-------------------------------|---|-----------|
| 3.2.2                         | Manufacture Graph from Dataset . . . . .  | 18        |
| 3.2.3                         | Finding Shortest Path using Dijkstra Algorithm on Group NN Queries . . . . .    | 22        |
| 3.2.4                         | Manufacture Load Distance Method . . . . .                                      | 22        |
| 3.2.5                         | Manufacture GUI . . . . .   | 24        |
| <b>IV Experimental Result</b> |   | <b>25</b> |
| 4.1                           | System Examination . . . . .  | 25        |
| 4.1.1                         | Purpose . . . . .   | 25        |
| 4.1.2                         | Data Scenario . . . . .   | 25        |
| 4.1.3                         | Experiment Scenario . . . . .   | 26        |
| 4.2                           | Specification for Hardware and Software . . . . .                               | 26        |
| 4.3                           | Result of Examination . . . . .   | 27        |
| 4.3.1                         | 1st Case (Customers choose the optimum warehouse) . .                           | 27        |
| 4.3.2                         | 2nd case (Customers choose the chosen warehouse in the real company.) . . . . . | 40        |
| <b>V Conclusion</b>           |   | <b>44</b> |
| 5.1                           | Conclusion . . . . .  | 44        |
| 5.2                           | Suggestion . . . . .  | 44        |
| <b>References</b>             |   | <b>45</b> |
