

## ACKNOWLEDGEMENTS

I would first like to thank my thesis advisors Mrs. Dade Nurjanah, Ph. D and Mr. Dana Sulisty Kusumo Ph. D of School of Computing at Telkom University. The way to their office was constantly open at whatever point I kept running into an inconvenience spot or had an inquiry regarding my exploration or writing. They reliably enabled this paper to be my own work, yet controlled me in the privilege the course at whatever point they thought I required it.

I would like to thank the examining committee who were involved in the comment and suggestion for this research project: Chairperson of the jury Mr. Jimmy Tirtawangsa, Ph. D, jury members Mrs. Yanti Rusmawati, Ph. D and Mr. Dr. Putu Harry Gunawan. Without their passionate participation and input, the thesis research could not have been successfully conducted.

I gratefully acknowledge financial support from PT Telkom Indonesia (Persero) Tbk through the scholarship program. In addition, I wish to thank the following those who made valuable suggestion or who have otherwise contributed to the preparation of this thesis: Erwin Suryanto, Rommi Syafari, Rudolf Turnip, Edvya Noer, Andriyono Hutagalung, Yadi Supriyadi, Adhi Widyanto, Edyanus Pabendon, Mohammad Alifikri, Fiernad Napitu and all other PJJ class members.

At long last, I should offer my exceptionally significant thanks to my parents and to my lovely spouse for furnishing me with unfailing help and consistent support during my time of study and through the way toward researching and composing this thesis. This achievement would not have been conceivable without them. Much thanks to you.
