## LIST OF TABLES

2.1	Related Literature Summary . . . . .	13
3.1	Example of distribution of superpixel by topological position . . . . .	25
3.2	Proposed method contributions . . . . .	37
4.1	Number of images and total of polygon for seven classes . . . . .	41
4.2	Comparison of ground truth from training image . . . . .	42
4.3	Comparison of area of ground truth from training image . . . . .	43
4.4	Confusion Matrix for SVM model with number of superpixel (60) . . . . .	43
4.5	Confusion Matrix for SVM model with number of superpixel (90) . . . . .	44
4.6	Confusion Matrix for SVM model with number of superpixel (120) . . . . .	44
4.7	Confusion Matrix for SVM model with number of superpixel (180) . . . . .	44
4.8	Confusion Matrix for SVM model with number of superpixel (240) . . . . .	45
4.9	Confusion Matrix for SVM model with number of superpixel (360) . . . . .	45
4.10	Accuracy of Testing Image (SVM vs Guided SVM) . . . . .	46
4.11	Predicted Accuracy for two label categories based on label refining . . . . .	47
4.12	Predicted Accuracy for three label categories . . . . .	48
4.13	Predicted Accuracy for four label categories . . . . .	49
4.14	Comparison of Prediction Accuracy on Image Level . . . . .	50
4.15	Comparison of Prediction Accuracy RLA . . . . .	51
