

## LIST OF TABLES

2.1	Object Ball Data . . . . .	22
2.2	Result of Generalization Object by DBLEARN . . . . .	23
2.3	Data of seven people . . . . .	24
2.4	Dissimilarity between 7 people . . . . .	24
2.5	Interpretation of silhouette width . . . . .	31
3.1	Differences of Modified PDF and PDF. . . . .	38
3.2	Number Criminal of District in Jakarta . . . . .	44
3.3	Spatial Structure of Cilincing Region . . . . .	46
3.4	Criminal Location in Cilincing Region . . . . .	48
3.5	Crime Datasets . . . . .	48
4.1	Davies Bouldin Index for the dummy region datasets . . . . .	58
4.2	$DB^p$ for event location are more than a location . . . . .	59
4.3	Mapping crime by using number of crime . . . . .	61
4.4	Mapping crime by using number of crime and region . . . . .	62
4.5	Number of disjoint member cluster . . . . .	63
4.6	Mapping crime by using number of crime, region and event location . . . . .	66
4.7	Cluster result for Crime region in Jakarta . . . . .	67
4.8	Weight Combination . . . . .	67
4.9	Best weighting combination of best cluster for dummy datasets . . . . .	68
4.10	Best weighting combination of best cluster for Mapping crime in Jakarta	69
4.11	Comperasion Best Cluster Validity Index . . . . .	72
