

## **ABSTRACT**

*Education for children with special needs is important. Where this special education that can facilitate the development of children in an education. As a means of providing educational facilities, slb is demanded to facilitate mobility in every user. SLB is often not considered and considered normal so that given facilities can not organize all activities of users, especially children with special needs. The shape, color, and layout of the room at an extraordinary school is one of the factors that have a major influence on the mobility of children and other users in education.*

*Blind school is one of the schools that provide facilities for visually impaired or under-sighted learners. Bandung is one of the cities that provide educational facilities for the visually impaired. This blind A special school demands a more specialized design that can facilitate mobility and child orientation. Activity with a long time requires that the design contained in each area can be responded by the user quickly. Through the method of subject analysis and object design problems, the design of the interior of the school is amazing A blind person with the atmosphere of simplicity is considered to be important considering the security, comfort and character of the user is one of the factors that affect the education of lea.*
