

ABSTRACT

The Office is the pplace ypu are use to work and in complete with some supporting facilitiens in it. Council building is one of agencies which are engaged in public services. The focus of the design of this is a building an office building the DPRD of kota Binjai north Sumatera Utara. As gevernment buildings ot building at the state of this building have a problem in the field of comfort and aesthetics buildings and as well as the level of community service. The problems that in met on the building of the in the form of the application of the layout of, facilities, the circulation of the, community service and identity of the office as the office of local gevernment. An office building for the who not well cared for also needs to watch its cleanliness in against the implementation of the design and. Hence, city council building Binjai let in engineering with the application of the traditional culture on the building of the elements and can create a room that is impressed honest and transparent, comfortable and describe regional image.
