
LIST OF FIGURES

2.1	DNA Microarray	8
2.2	Random Forest	10
3.1	Design Process of Research	15
3.2	Flowchart Dimensional Reduction	17
3.3	Process of K-Means	18
3.4	Classification Using Random Forest	18
4.1	Trend of the number of clusters to the value of the silhouette index	31
4.2	Trend of the number of feature selected to accuracy for colon cancer	32
4.3	Trend of the number of feature selected to accuracy for lung cancer	33
4.4	Trend of the number of feature selected to accuracy for tumor prostate	34
4.5	The results of the number of trees to accuracy	34
4.6	Trend of the number of k -fold cross validation to accuracy for colon cancer	35
4.7	Trend of the number of k -fold cross validation to accuracy for lung cancer	36
4.8	Trend of the number of k -fold cross validation to accuracy for tumor prostate	37
4.9	Difference of accuracy RF and proposed method	39
