

ABSTRACT

Web Based Application of Collection Task and Its Discussion for Try Out is an application that can be used for try out exam. Based on quisionnaire can be concluded that there are students who still usually confused when learning material as well as less of media that can be used as an evaluation to see their learning result because the school is not always able to provide tasks for students. Based on the problem occur, then an application is made to help the teacher to be able to find out how readiness students to face the try out exam and facilitate students in evaluating their learning result and knowing how far they mastery the exam. This application is created by using HTML, CSS, and PHP program language and PhpMyAdmin storage. In the designing this application System Development Life Cycle (SDLC) method with the waterfall model is used. Start from requirements analyse, system design, coding, testing and implementation. With the making of this “Web Based Application of Collection Task and its Discussion for Try Out”, students and teacher can find out the progress of their learning that have been done.

Keywords : Application, Collection Task, Nasional Exam, Try Out, Waterfall.
