

ABSTRACT

Tahfidz Qur'an Al-Azhar Center is a facility and means of non-formal education in learning and memorizing the Qur'an. The Tahfidz Al-Qur'an Center Al-Azhar is a response to the increasing interest in learning and memorizing the Qur'an in Muslim communities, especially in Jakarta. The increasing interest in memorizing the Qur'an is no longer only experienced by school-age children but also adults who have high busyness, so that people need educational services that can accommodate the Qur'an's memorization activities more flexibly. The interior design of the Tahfidz Al-Qur'an Al-Azhar Center is a new design located in Jalan Senopati, South Jakarta City. This design aims to create an interior space of qur'an education that is expected to achieve effectiveness in learning, more interactively.

Keywords: *Tahfidz Al-Qur'an Center, Al-Azhar, Interactive*
