

ABSTRACT

Various countries continue to race to follow trend world from various types of beauty treatments that are done. But there is a lack of a beauty clinic that oversees the facilities and activities of the clinic. Medina thought the influence of the lifestyle of the people of Jakarta who tended to experience pressure so that the stress and life habits of the city people were easy to be fast from a time perspective that could lead to an unhealthy lifestyle. The development of the times towards the direction of modernity requires humans this century to always be active and up to date. Humans are competing to become actual in the application of all things that are modern, including in the field of work. As compensation, most of the time is spent in the busy world of work. The lack of work that requires muscle performance causes physical untrained. This untrained physique triggers a decrease in stamina and physical tension which ultimately impacts the brain-based work itself. Pressure for pressure in the face of job competition and the lack of time to just relax and socialize make these workaholics very vulnerable to a crisis of work comfort, which if sustained will cause prolonged depression and stress. All of that has an impact on a body that is not fresh and also dull so that it makes it unattractive by using the Relash Theme and also the Modern concept.
