

As reader will be aware, many apps and mobile project are available across multiple device and platforms. Rather than confuse each case study with multiple links, we have created a single link [www.taschen .com/tamcsb](http://www.taschen.com/tamcsb) which readers can acces to see all available device, video demos and more for each app and mobile project in this book.

We have also created a simple list of icons so you can quickly identify what devices each app or mobile project is available on and whether or not there are additional items of content available to view,i.e. video demonstrations, etc.
