ABSTRACT

Fiqh is a science that discusses the laws in Islam, is a rule in various fields of life of Muslims. Fiqh has two sources as a guideline for the life of the Qur'an and Sunnah, fiqh discusses laws according to that source. The Fiqh Consultation application is an application that connects an ustaz with a Muslim who has agreement in the implementation of worship procedures and laws in the implementation of worship or daily activities, based on the results of a survey of 231 respondents. In implementing procedures and law in worship and 75.3% asking for a solution to the problem is very important. The purpose of this research is to make user interface (UI) design solutions based on the results of user experience (UX) analysis that can meet user needs and requirements. The importance of UI / UX in application development to make it easier for users to control applications, get responses from interactions and understand user needs. In the design of this study using user-centered design methods, this method supports the needs and requirements of users. The results of the study are design solutions in the Fiqh Consultation Application that can be accepted by users with a SUS score of 78.

Keywords: UI / UX, Jurisprudence Consultation Application, User-Centered Design.
