

ABSTRACT

CV Restu Mande is included in a small company because the range of turnover is more than 300 million to 2.5 billion rupiah. CV Restu Mande has two separate production units, namely restaurants and packaging products. This web-based application handles production activities at Restu Mande restaurants. At the restaurant, Restu Mande's production activities have not recorded costs in detail. Reports on production costs at restaurants are needed to see the costs spent in producing each dish. The financial reporting at Restu Mande's restaurant is done manually so that the company owner has to wait a long time to get the report. This web-based application was built with object-oriented methods and the development of prototype models and using the PHP programming language with the framework code igniter. This application has the functionality of recording production costs with process costing method, as well as making accounting records and financial statements. Testing this application uses the black box testing method.
