the Office of the Government of one of the main gasalitas in running the Government in the suati area. In the running of the autonomous regional government, the Mayor and the Deputy Mayor had to have a Government Office appropriate to your needs in order to support national development and application of the vision and mission of the Government, in addition to supporting the implementation of the vision and mission Government offices in particular Mayor's Office can accommodate the needs of the community as a public service center, where there is part part of the Regent Regent policy and position that interact directly with the community in doing the implementation of the work programme. The city of Payakumbuh in live right his autonomous region to 48 years old now still currently still vigorous and active in carrying out the Development of Development, the Community Economy, and also the improvement of the religious city according to the philosophy of the Minangkabau community, Adat basandi Syarak, syarak basandi of the Kitabullah.

Through the explanation above, the research and design of the Interior Office of the Mayor of Payakumbuh will be carried out by applying the optimization of Space requirements, the needs of activities and user facilities in the design. with the character of the City of Payakumbuh by not leaving the local wisdom of the city Payakumbuh. In this design, it is also based on government regulations which become a reference for the designation of agreements between regional governments, the State Civil Apparatus (ASN) and the public.

Keywords: Gouvernment Officce, Gouvemement Goals, Public Service Center, Optimalization Workspace.
