## **ABSTRACT**

Firm value is an investor's view of the company's achievements related to stock prices in the capital market, by maximizing the value of the company is very important, because maximizing company value shows the company maximizes its main goal in obtaining profit levels.

The independent variables in this study are value added capital employed, value added human capital, structural capital value added and managerial ownership. The dependent variable in this study is firm value. This study aims to analyze the effect of value added capital employed, value added human capital, structural capital value added and managerial ownership on firm value in mining sector companies listed on the Indonesia Stock Exchange.

The population in this study are mining companies listed on the Indonesia Stock Exchange in 2015 - 2018. The sample selection technique used purposive sampling and obtained 16 companies with observations over four years so that 64 samples were observed. The analysis technique used in this study is panel data regression analysis using the Eviews 9.0 application.

Based on the results of the analysis, the added value of capital used, the added value of human capital and managerial ownership have an average value smaller than the standard deviation, which means having diverse data and not grouped (heterogeneous), while the structural added value of capital and firm value has an average value greater than the standard deviation, which means having data that is not varied and grouped (homogeneous).

Simultaneously the variable value added capital employed, value added human capital, structural capital value added and managerial ownership affect the firm's value. Partially the variable value added capital employed and managerial ownership have a positive effect on firm value, while the variable value added human capital and structural value added capital have no effect on firm value.

**Keywords**: Firm value, value added capital employed, value added human capital, structural capital value added, managerial ownership.
