

ABSTRACT

Aliyah Medika Clinic in a clinic located on Sukabirus Street No. 37, Dayeuhkolot, Kabupaten Bandung. In managing salaries and employee attendance arise several problems, namely the recording of salaries and presence that is still done manually into the book, which can cause many problems such as data damage due to loss, errors in humans and others. Therefore, a system is created to manage employee payroll and attendance process. This web application ide bult using the SDLC (System Development Life Cycle) method with the waterfall model and using the PHP CI (Codeigniter) programming language and MySQL database. This application will be built to calculate employee salaries and see the history of employee attendance. The results for this application can be used for solutions to difficulties that often occur in the Aliyah Medical Clinic.
