

ABSTRACT

Soreang is the capital of Bandung Regency which has a Muslim population of 3,104,184 out of a total population of 3,178,543 inhabitants. Tourists who visit need religious facilities and Islamic tours that are comfortable and support the religious activities of the tourists who come. Also supporting facilities are the main activities of tourists for activities such as Function Rooms, Libraries, Classrooms that support religious and cultural tourism activities in Soreang. This could be a great opportunity for Bandung Regency especially Soreang to introduce culture to Islamic tourism that came to stop to worship in Soreang District.

This design includes the study phase of literature relating to the Design of Islamic Centers and analyzes related to Soreang District, Bandung Regency. "Growth of Modern Islamic" is the theme derived from the process of problem analysis and the description of design solutions from problem identification. Through this process, it is hoped that the interior design of the Islamic Center of Soreang District in Bandung Regency can help preserve Islamic culture and tourism in Bandung Regency.

Keywords: Islamic Center, Progressive, Soreang District.
