Burung dan Bunga Lasem;s Batik Sling is one of batik sling's fabric that has been used by Indonesian people especially Lasem's people. Its dominant of black color that make being unique of this batik fabric. In other side, modern sling which is innovation of traditional sling is springing up more and more. One of modern sling is ringsling. Ringsling has two ring on one fabric edge that has a function as binding the sling. But, at the moment, ringsling use a motif like a cartoon figure, flower, ball, etc as told from Certified Babywearing Consultant, Mrs. Afifah Mu'minah.

Research method that used is qualitative with method of collecting data are observation, interview, study of literature, and exploration that start with making a stilation, compositon, coloring, until applicated to product.

Final result of this research is innovation motif that inspired by Burung dan Bunga Lasem's batik sling with modern classic and minimalist style. After that, the innovation motif was applied on ringsling product with digital printing technique.
