

## **ABSTRACT**

The park is a place for recreation and gathering with friends or family, recreation, education, sports, playing with children, and training of children's interactions. Education is one of the park's functions, therefore a mini zoo was built. Inside the mini zoo are animals such as rabbits, various species of birds, chickens, peacocks and sheep. Mini zoo has been operating officially since early 2018. Visitors can observe a variety of animals free of charge. Visitors can only observe animals so that the mini zoo section of Taman Balai Kota Bandung still looks empty of visitors. Therefore, the author will create an interactive game that will be placed in a rabbit cage so that visitors can interact with rabbits in Bandung City Hall Park.
