

ABSTRACT

The music park is a park that carries the concept of music, As the name implies, the garden music ornaments are filled with things related to music. This park is often held activities related to music. In the middle of the park there is also a basketball court that is often used by visitors to exercise. However, when the days can be relatively quiet music park visitors. The lack of interactive facilities in the park is considered less attractive to visitors. This makes visitors easily bored with existing facilities in the music park, so that facilities or products that are able to add to the park's interactive facilities and make visitors feel interested and meet visitor satisfaction. The purpose of this design is to create an integrated park bench with interactive sound and garden lighting.
