

ABSTRACT

Firm value is a measure for investors to value a company. Firm value can be measured from the stock market price on the capital market. Sometimes the value or price goes up and it can also go down. If a firm's value is good, it will have a good impact on the company from all aspects.

This study aims to analyze the factors that influence the value of the company through corporate social responsibility disclosure, independent commissioners, net profit margins and size in mining sector companies in 2016-2018.

The data used in this study were obtained from annual report data. The population in this study are mining companies listed on the Indonesia Stock Exchange. The sample selection technique was purposive sampling and obtained 31 companies in the 2016-2018 research period. The data analysis method in this research is panel data regression analysis using E-views version 9 software. The total sample used from the reduction with the purposive sampling technique was 67 samples, consisting of 28 companies over a 3-year period, with 17 samples of outlier data. The data analysis model of this research is panel data regression analysis, descriptive analysis, classical assumption test, simultaneous test using the F test and partial test using the T test.

The results of this study are the Corporate Social Responsibility Disclosure, Independent Commissioner, Net Profit Margin and Size simultaneously have an effect on Firm Value, partially Corporate Social Responsibility Disclosure and Net Profit Margin have no effect on Company Value, while Independent Commissioners and Size have a negative effect on Firm Value.

Keywords: *Corporate Social Responsibility Disclosure, Independent Commissioner, Net Profit Margin, Company Value, and Size.*
