Wild animals are pets that used to have owners who were not capable of taking care of their pets both financially and emotionally. However, whit this incident continues to be repeated and cannot be stopped easily so that the number of wild animals continues to increase. This design will be located nearby Mount Sindur, Bogor City, where at this location they did not have many animal shelters with adequate facilities because shelters in this area were only just shelters, where shelters should have clinical health facilities and adoption facilities. Which where facilities such as shelters, clinics and adoption centers that will be designed in the area will hopefully improve the quality of life and well-being not only the community and wild animals in the Mount Sindur environment, Bogor City.

Key words: animal shelter, clinic and adoption center; improving life quality and well-being both animal and community.
