

ABSTRACT

Istana Salon is a Form of service business engaged in the field of beauty that provide s hair care services and body is located on Jl. Raya Banjaran No. 226, Andir, Kec. Baleendah, Bandung, Jawa Barat. Currently, the computerized process of transaction logging system is indispensable i n a company as it can facilitate and accelerate its users in recording transactions. In carrying out the process of accounting records, especially in the recording of cash receipts and cash disbursements, Istana Salon has not been computerized and there is no accounting recorded so that errors often occur that will affect the company's survival.

Thus, a web application is created that can record cash receipts and cash disbursements that produce reports in the Form of journals, ledgers, balance sheets and cash flow statements. System design using Unified Modeling Language (UML) and Entity Relationship Diagrams (ERD) and using the Prototype method with the development of Software Development Life Cycle (SDLC). Implementation using PHP programming language with CodeIgniter Framework and MySQL database. Testing the app using the Black Box Testing method on the application's functionalit y.

Keywords: Web-Based Applications, Cash Receipts, Cash Expenditures, Cash Flow Reports.
