JawaPos.com is part of the Jawa Pos Group, the largest media network in Indonesia. With more than 200 media spread throughout Indonesia, from Sabang to Merauke. Starting from a small newspaper in Surabaya which was founded on July 1, 1949, the Jawa Pos business has now expanded into television media, digital funding events. Jawa Pos entered the digital business in 2014 by presenting JawaPos.com. The role of information technology is quite important in supporting the business processes of the company. In order to take full advantage of the role of technology so that it is aligned with the business being carried out, it is necessary to design an enterprise architecture that is appropriate to the financial reporting function of Jawa Pos. There is a framework that can be used as a reference in designing an enterprise architecture, namely TOGAF ADM. For the design of entrepreneurship architecture carried out in this study only includes the preliminary phase, Architecture Vision, Business Architecture, Data Architecture, Technology Architecture due to time constraints and has been agreed upon by the Advisor, so this research is only up to the Technological Architecture phase. Results of EA Design in the study This results in an artifact that explains the function of the financial reporting business of PT Jawa Pos Koran. Application design is carried out in several activities, especially in the financial reporting function, from the results of the analysis and design that has been made it is expected to become a guide in the development of information technology at PT Jawa Pos Koran

Keywords: Enterprise Architecture, TOGAF ADM, PT jawa Pos Newspapers
