

## ABSTRACT

*The market value of the company's shares formed between the buyer and the seller in the event of a transaction is called the market value of the company, because the stock market price is considered a reflection of the value of the company's actual assets. The value of companies formed through indicators of stock market value, is heavily influenced by investment opportunities.*

*This research aims to test the effect of Capital Structure (DER), Profitability (ROE), and Company Size (SIZE) on the value of companies proxied by Price to Book Value (PBV) on Mining sector companies listed on the Indonesia Stock Exchange for the period 2015-2018.*

*The data used in this study is obtained from financial report data, namely the financial statements of Mining Sector Companies for the period 2015-2018. The population in this study was mining sector companies for the period 2015-2018 registered in IDX and obtained 11 companies with samples selected based on purposive sampling. The method of data analysis in this study is the regression analysis of the data panel. The analyze method in this study uses data panel regression analysis using software version 10.*

*The results showed that the capital structure negatively affected the value of the company in the mining sector listed on the Indonesia Stock Exchange in 2015-2018. While the profitability and size of the company has no effect on the value of the company in the mining sector listed on the Indonesia Stock Exchange in 2015-2018.*

**Keywords:** *Capital Structure, Company Size, Company Value, Profitability.*
