

ABSTRACT

The terminal according to the Ministry of Transportation (1996) is one of the components of the procurement of a transportation system that functions as a temporary stop for public vehicles to pick up and drop off passengers and goods to their final destination. at Leuwi Panjang Terminal, this terminal is in an alarming condition. which includes the use of facilities and spaces that are not functioning optimally, circulation of irregular accessibility, and the lack of directional signs that make it difficult for room users to find the room they want to go to. Room users feel uncomfortable with the condition of the terminal building. , therefore, Local wisdom is an approach to psychology, as well as policies regarding local wisdom. The Redesign of Leuwi Panjang Terminal uses a Local wisdom approach because it is expected to give an impression of the locality of the local customs.
