

ABSTRACT

This study was conducted to determine the results of the influence of the employee's work environment on employee productivity during work from home at the Bandung Regency Regional Revenue Agency, in this study there is a phenomenon that there are employees who still feel uncomfortable with the work environment that affects employee work productivity.

The sampling technique used in this study uses a non-probability sampling technique with the sampling technique used is probability sampling with a random sampling technique, based on calculations with the Slovin formula, the result is 50.87, so to facilitate further calculations, the number is rounded to 51 person.

Based on the results of the descriptive analysis that has been done, it can be seen that the responses of respondents who are employees at Bapenda West Java regarding the work environment are in the medium category and the work productivity of employees is in the medium or sufficient category. Based on the results of research on "The Effect of Employee Work Environment on Employee Productivity During Work From Home at the Regional Revenue Agency of Bandung Regency", it is concluded that the work environment has a significant influence on employee work productivity at Bapenda West Java. The office should provide additional facilities for employees who are working from home, of course these facilities can support employees while working from home
