The Regional Government of South Tangerang City has implemented a Planning, Budgeting and Reporting Management Information System to compile the RPJMD and Regional Planning. as a business solution framework to solve problems in optimizing the use of IT in accordance with the General Administration and People's Welfare Division of the Planning Sub-Section in supporting the performance of the Regional Secretary to maintain flexibility with openness to the public in the Management of its Special Regional Planning in South Tangerang City.

The planning sub-division which is responsible for regulating regional planning, in its day-to-day duties, there are still many deficiencies that must be fixed so as to produce an effective and efficient work product. Effective means an effort to achieve the expected goals, results or targets with a predetermined time. Efficient is meant is appropriate or suitable for doing (producing) something (without wasting energy, time, cost); can carry out the task properly and carefully. This research uses TOGAF 9.1 which consists of preliminary phase, vision architecture, business architecture, information system architecture, technology architecture, opportunities and solutions, and Migration Planning. From all these phases an architectural blueprint will be generated and an IT Roadmap for the implementation of the application for the Public Administration and People's Welfare Planning Sub-Section.

Keyword: Blueprint, IT Roadmap, TOGAF, e-Budgeting, and Subbagian Perencanaan
