

ABSTRACT

In this day, traveling activities are favored by many people, they go on tours not only to unwind, but also to take pictures and post on social media. Due to the influence of social media, currently tourist attractions are developing rapidly along with the times, ranging from natural tourism to artificial tourism which is currently aesthetically pleasing to take pictures. One of the most visited areas and has a variety of tourist attractions is Bandung. But often when we want to travel, we are confused about determining which tourist destinations to visit. This Bandung city tourist destination application is made to make it easier for users who want to travel to Bandung. This application will display a list of tours, a description of the selected tourist information, as well as the location of the tour which when clicked will be directed to Google Maps.

This application will also display recommendations and can search for specific tourist attractions that will make it easier for tourists to choose the tourist attractions they will visit. Users of this application can save their favorite tourist attractions by clicking the favorite icon on the description of tourist attractions, tourist attractions that have been favorited by users will enter the favorite travel page in this application. In this application, there are 100 data on tourist attractions in Bandung along with 4 categories of tourism, namely natural tourism, artificial tourism, animal tourism, and water tourism. This application is expected to help people who want to visit the Bandung. With this application, it is hoped that many tourists are interested in visiting the tours in Bandung.
