

LIST OF TABLES

Table II. 1 Advantage and Disadvantage of French's Design Process	8
Table II. 2 Advantage and Disadvantage of Reverse Engineering Method.....	9
Table IV. 1 Problem Analysis.....	23
Table IV. 2 Anthropometric Data	25
Table IV. 3 Need Statement.....	28
Table IV. 4 Task Clarification	29
Table IV. 5 Morphological Chart.....	31
Table IV. 6 Alternative Principle Solution	32
Table IV. 7 Qualitative Evaluation	32
Table IV. 8 Criteria, Parameter, Unit.....	37
Table IV. 9 Force Act on Frame	38
Table IV. 10 Average of Maximum Stress on Frame	38
Table IV. 11 Parts Used in Variant V2	39
Table IV. 12 Parts Used in Variant V4	39
Table IV. 13 Theoretical Cost of Manufacture of Variant V2.....	41
Table IV. 14 Theoretical Cost of Manufacture of Variant V4.....	42
Table IV. 15 Criteria Score of Variant V2 and V4	43
Table IV. 16 Criteria Classification	44
Table IV. 17 Chosen Concept Calculation.....	44
Table IV. 18 Translation for Main frame Part	45
Table IV. 19 Ranking of Main Frame Material	46
Table IV. 20 Tranlation of Top Acrylic Material	46
Table IV. 21 Ranking of Top Acrylic Material.....	47
Table IV. 22 Final Specification of Delivery Bed Chamber.....	48

Table V. 1 Task Clarification Analysis.....	57
Table V. 2 Solution Principle.....	59
Table V. 3 Qualitative Evaluation V1	60
Table V. 4 Qualitative Evaluation V2.....	61
Table V. 5 Qualitative Evaluation V3	61
Table V. 6 Qualitative Evaluation V4.....	62
Table V. 7 Criteria, Parameter, Unit Used in Design.....	63
Table V. 8 Criteria and its Weight	64
Table V. 9 Benefit and Cost Classification.....	64
Table V. 10 RULA Score Explanation	66
Table V. 11 Ergonomic Factor Criteria used in Research	67
Table V. 12 RULA Score in Using Product.....	68
