

ABSTRACT

The case of covid in Indonesia itself is still not completely resolved. The author has also carried out small monitoring of each author to a place in the city of Bogor, in fact there are still young people who do not use masks and do not comply with social distancing. The purpose of this research is to build students' insight in implementing COVID-19 prevention measures when schools reopen.

With the existing problems, the author decided to execute the answer to this phenomenon in the form of an educational comic digital book that will go through the official webtoon comic website. The method used to design this research is a qualitative method that is analytical and descriptive, so that the author can develop and refine the theory obtained based on the data, the type of data used is an open questionnaire, the reason the author takes over the protocol is for mutual security and maintaining the protocol, the observation method is also used by the author to examine the phenomenon under study.
