

## LIST OF FIGURES

2.1	Internet of Things Architecture . . . . .	8
2.2	The influence of water temperature and pH on the percentage of unionized ammonia[3] . . . . .	9
2.3	Dissolved concertation[4] . . . . .	11
2.4	Dissolved oxygen estimation[4] . . . . .	12
2.5	Fuzzification, Fuzzy Rule Base, Fuzzy Inference Engine and Defuzzification [5] . . . . .	13
3.1	Proposed System Development . . . . .	16
3.2	Numerical computation result from equation 3.2 . . . . .	18
3.3	NH <sub>3</sub> of Ammonia Membership . . . . .	21
3.4	Dissolved Oxygen Membership . . . . .	21
3.5	Water quality membership . . . . .	22
3.6	Water quality output . . . . .	23
3.7	Components . . . . .	24
4.1	Base Voltage . . . . .	26
4.2	Volatage after calibration . . . . .	26
4.3	pH Solutions . . . . .	26
4.4	Calibration Graph Between the pH solutions and the Volt pH sensor . . . . .	27
4.5	TDS Meter . . . . .	28
4.6	DS18B20 Temperature Probe . . . . .	28
4.7	Temperature Level on experiment . . . . .	28
4.8	PH Level on experiment . . . . .	29
4.9	(a) PH Value at 11:48 AM (b) PH Value at 12:00PM in Fuzzy Membership Plot . . . . .	30
4.10	PH Value at 14:48 PM in Fuzzy Membership Plot . . . . .	30
4.11	PH Value at 15:12 PM in Fuzzy Membership Plot . . . . .	31
4.12	PH value at 09:48 AM in Fuzzy Membership Plot . . . . .	31
4.13	PH value at 11:00 AM in Fuzzy Membership Plot . . . . .	31
4.14	Estimation Nh <sub>3</sub> . . . . .	32
4.15	Dissolved Oxygen . . . . .	33
4.16	Water Quality Level . . . . .	34
4.17	Seneye Multi Sensor Dashboard . . . . .	35
4.18	Comparison Seneye NH <sub>3</sub> with Estimation NH <sub>3</sub> with and without Constant . . . . .	39
4.19	Water Quality Level after adding constant value . . . . .	40
A.1	SENEYE Monitor Product[6] . . . . .	48
