ABSTRACT

Web-Based Presence And Salary Calculation Aplication is an application that is used specifically by staff in the field of Human Resources (HR). The current system is still done manually so that HR staff find it difficult to manage all employee data such as: National Identification Number (NIDN), Education Personnel Identification Number (NITK), position, address, cellphone number, and so on. Then the HR staff had difficulty inputting employee daily attendance data and managing the salaries of all employees. This information system has the following features: account login feature, manage employee and lecturer data, search by subject you want to search for, input attendance, and automatic payroll based on applicable regulations. This final project is made with a prototype software development model to model the system and use the PHP programming language with the Laravel framework and MySQL database and other software. This information system is expected to be able to provide effectiveness and efficiency to all Human Resources Staff (HR) at the Immanuel College of Health, Bandung.
