

Abstract

There are more and more cases of parents neglecting their children in Indonesia. While children are entrusted from God who should be protected and educated so that they can become the nation's successors. The existence of abandoned children on the streets is a reflection of the lack of equitable distribution of social welfare that occurs in society. So we need an institution that can be used as an alternative for child care, one of which is the Ciumbuleuit Children's Social Protection House (RPSAA) Bandung which has the goal of realizing foster children who are intelligent, healthy, disciplined, accomplished, independent and have noble character.

To realize the goals of RPSAA Ciumbuleuit Bandung, the facilities needed are needed based on the Decree of the Minister of Social Affairs of the Republic of Indonesia No. 50/HUK/2004. However, there are several facilities that are not yet available so that they can affect the optimization of activities and objectives of RPSAA Ciumbuleuit Bandung.

By reviewing the psychology of the house which means a dwelling that is used to rest and can create a calm, peaceful, pleasant atmosphere for its residents. So we need a design that can create a homey atmosphere with warmth and joy so that orphans can feel the atmosphere that suits their needs just like at home. Based on these problems, the character of children is very suitable to be taken as a basic approach related to the problems they usually face. Therefore, it is necessary to redesign the interior for the ChildCare Social Protection Home.
