Panti Wredha is a place for the elderly to get care, attention, and care. Many nursing homes are inhabited by the elderly who no longer have a home, and it can also be from their own desires. There are many differences from each elderly and adapted to these needs. Therefore, the psychology of the elderly must be very carefully and carefully considered so that the elderly who live in the nursing home are very comfortable and do not have pressure. However, most of these nursing homes, there are still many who do not think about the psychology of the elderly and safety in carrying out their daily activities, besides that this nursing home is still not optimal in terms of comfort and safety for the elderly. Thus, a redesign of the Tresna Werdha Budi Pertiwi Home is needed which aims to maximize all the facilities needed and in accordance with the standards for an orphanage. After conducting a site survey and analyzing data in accordance with the design so that the design approach used for this design is an approach to a solution for a psychology for the elderly, which is useful for the elderly to be able to live their life in peace, safety, and comfort. For the theme used is "Homey" the application of this theme is expected to help the elderly to feel very comfortable and safe to live their old age at the Nursing Home. From the theme, it is hoped that the orphanage is everything to them and a very meaningful place for their old age. While the concepts used can also be implemented in a comfort for the elderly in carrying out their daily activities. So the concept used is "Preciously aging" where with this concept the elderly can become productive and prosperous elderly.

Keywords: nursing home, elderly, psychological elderly
