

ABSTRACT

Indonesia has many volcanos which in between are Mount Gede and Mount Pangrango that are located in Mount Gede Pangrango National Park (TNGGP) West Java area. In year 1980 Mount Gede-Pangrango became one of five first announced national park alongside with Komodo National Park in East Nusa Tenggara. TNGGP has three tracks to access the area that each track has their own difficulties. In this case, hiking activities in TNGGP area need good understanding about hiking and nature for anticipating loses towards hiker and loses towards the national park. Because there are still many accidents occurred from hiking and adversely affect the environment in that area. Therefore, the author makes a guidebook design as information media for hiking Mount Gede-Pangrango. Using qualitative research method which are, make observations, do interviews with expert and TNGGP manager to research the phenomenon raised. The guidebook could be presented as print and digital so they could be obtained easily on the internet. Other than that, digital book drives possibilities to apply multimedia like animation in it and become motion book.

Key words: Guidebook, hiker, TNGGP hike, animation, motion book.
