

ABSTRACT

Selection of Hamlet is an activity that is carried out in the division of Indonesian territory under hamlets or neighborhoods. Residents in the neighborhood elect the Chief of the Hamlet in Indonesia similar to the Presidential election or the Regional Head election. However, before making the election, the residents should know and understand the vision and mission of the candidate for Head of the Hamlet. One solution so that residents can know and understand the vision and mission of the candidate for Chief of the Hamlet, a hands on paration application is built. So that the result of the application can find out the vision and mission, work programs, and comments in the form citizen assessments of the candidate for Chief of the Hamlet.

Keywords: Hamlet, application, hands on paration
