

ABSTRACT

PT. Tourezia Cakra Inspira is a service company engaged in Tour and Event. PT. Tourezia Cakra Inspira is located on Jl. Poqung Dalangan No.27B, Poqung Kidul, Sinduadi, Kec. Mlati, Sleman Regency, Yogyakarta Special Region. The process of recording the realization of vendors and non-vendors at PT. Tourezia Cakra Inspira is still done manually using Microsoft Excel, so PT. Tourezia Cakra Inspira experienced problems in classifying transactions carried out with related vendors, therefore the recording of PT. Tourezia Cakra Inspira is not structured properly, there are still errors in the nominal recording. Web-Based Applications for Event Management: Activity-Based Realization Module was built using the PHP programming language method and the CI Framework to overcome the problems that exist in PT. Tourezia Chakra Inspira. With the development of this technology, the system for recording purchases and realization of events carried out by PT. Tourezia Cakra Inspira will be more structured and recorded computerized and financial transactions that occur will be stored in a database so that if historical data is needed it can be viewed again. The method used in this final project is the Software Development Life Cycle (SDLC) method using the prototype method.
