

ABSTRACT

Based on coordination with the KPKNL Bandung team, it is known that so far there have been several obstacles, namely there is no service website for KPKNL Bandung yet, service for submitting a meeting request has been disrupted due to the Covid-19 pandemic, and there are no facilities for customers to provide an assessment of the service they receive. KPKNL Bandung Landing Page in the Module of Information Service and Meeting Request is a web-based application that will be used by KPKNL Bandung to help manage meeting request submission from the public and manage information related to services and news provided by KPKNL Bandung. The method used to develop the application is the Waterfall Model Software Development Life Cycle. In the analysis stage, user requirement documents are collected and interviews with KPKNL Bandung are conducted. The application will be developed using the PHP programming language and MySQL database. The conclusion from the development of this application is that it is able to build applications that can facilitate the needs of the KPKNL Bandung based on the goals that has been set.
