

ABSTRACT

CV Karya Mandiri is a company engaged in the purchase and sale of goods for educational purposes in Kindergarten (TK), which is located on Jl Prof. Suharso, Karangkepoh, Banaran, Boyolali, such as traditional clothes and toys. For recording purchases and sales, they still use Microsoft Excel which makes the recording take a long time. With the use of accounting information technology, companies can more easily manage and record every transaction that takes place, such as recording purchase transactions and sales transactions. In this application, it is easier for the company to make reports every time they make purchases and sales transactions that take place such as purchase reports, sales reports and inventory reports, but there are no returns in this application. In making this final project there are several features such as company logins that are used to record customer data, record vendor data, record purchases, record sales, purchase reports, sales reports, inventory reports, general journals and ledgers, which makes it easier to see the recording of each the transaction by the company.
