

ABSTRACT

The Indonesian Prosecutor's Office is a state institution that has duties and authorities in law enforcement in Indonesia. The Cianjur District Attorney is a state institution that has its duties and authorities only in the district or city area. Many activities are carried out at the prosecutor's office such as recording, collecting case data, receiving and returning evidence, as well as the existence of public service facilities. Implementing a technology system at the prosecutor's office, can make activities and work more effective and efficient, thus creating a professional, proportional and accountable state institution. In addition, this technology will later create a comfortable space atmosphere so that the work done becomes more productive.
