

## ABSTRACT

Education is a fundamental thing in life, therefore education must be achieved by every individual, including individuals with special needs. Education services for students with special needs are Special Schools. Special Schools are starting to implement an inclusive education system. Therefore it provides various special needs to study in one environment. YPAC Special Schools Bandung City is one of the Special Schools that has started to implement the education system, so this SLB accommodates students with various kinds of special needs, among others: Visually Impaired, Deaf, Mentally Retarded, and Quadriplegic students. appropriate to be a design solution in the design of YPAC Special School in Bandung, because the inclusive design is a design that has the principle that to accommodate various needs, various solutions are needed. It is hoped that this final report can solve the problems found at the YPAC Special Schools Bandung City.
