

ABSTRACT

Poverty is one of the social problems in our environment. This causes not a few of the parents to abandon their children. Therefore we need an institution that can accommodate these neglected children. One of them is the Children's Orphanage. In Bandung, there are several orphanages for children, but of the many orphanages in Bandung, they do not necessarily have full eligibility for foster children to live in.

The Bhakti Pertiwi Children's Orphanage is an example of an orphanage-based child welfare institution that accommodates abandoned, orphaned and poor children. From some of the common problems that exist in children's orphanages, the new design plan for the Bhakti Pertiwi Children's Orphanage is one of the best things to do as a reference material for the feasibility of orphanage housing, especially in the city of Bandung.

The purpose of the interior design of the Bhakti Pertiwi Children's Orphanage is to support the creation of social welfare institutions with facilities in accordance with the standards set by the ministry regarding the standardization of orphanages and pay attention to the needs and activities of foster children so that they are able to support the development of foster children and are ready to enter the community. This interior design uses the concept of "Fun and colorful". With the hope, want to create a pleasant atmosphere and meet all the needs of children so as to create social welfare for neglected children.
