

## ABSTRACT

*Education is one of the important things for a nation because education will form a quality young generation. Inclusive education is a teaching system whose implementation combines children with special needs with normal children. The classrooms at the Lazuardi GCS class room are similar to regular classes in general, so creating a lack of special rooms for children with special needs, adequate facilities, and comfort in the learning process. With a spatial psychology approach referring to the needs of inclusive schools, a design is applied that can provide facilities, security and comfort for users to carry out their activities. This research method is qualitative. The results of this study are expected to provide more convenience for users.*
